Introduction	9	Designing a greenfield site	45
Chapter 1		Case studies	
Principles		Greenfield	48
Principles of human-scale communities	11	Grayfield	51
Enclosure of the public realm	14	Brownfield	53
The neighborhood, the five-minute walk, and the pedestrian shed	15	Town centers	55
The Transect	16	Downtown/infill	57
Districts	20	Transit-oriented development	58
The block	21	Military New Urbanism	60
Frontages and streets	21	HOPE VI public housing redevelopment	61
The Charter of the New Urbanism	24	Extensions to towns	63
Buildings and urban form	26	Chapter 4	
Chapter 2		Revitalizing Cities and Towns	
Shaping the Region		Revitalizing communities	66
New Urbanism shapes regional plans	30	Rebounding cities	66
Origins and public involvement	30	What is infill?	67
How new urbanists arrived at regionalism	32	How HOPE VI rescued public housing	68
Leading by example	32	Demographic changes favor urban development	68
Regional and large-scale new urban planning initiatives	33	The role of design	68
Open space preservation	34	New urban principles and public housing	68
Transportation and networks	35	How to blend into the city	69
Codes and the Transect in regional planning	37	Bringing a city back through design	70
Mapping the Transect	38	New city neighborhoods	70
The five-minute walk	39	Reclaiming old centers	71
Cool Spots	39	Suburban revitalization	72
Tips for coherent regions	39	Eight keys to waterfront renaissance	74
Other factors in regional planning	40	Chapter 5	
Chapter 3		Urban Retail	
Neighborhood-Scale Communities		Retail: Main streets, urban centers, and downtowns	76
New Urbanism's expanding scope	42	Advantages of urban centers	76
A new kind of suburb	44	Grayfield opportunities	77
Infill developments proliferating	45	Revitalizing historic main streets	78
		Size matters	78
		A primer on retail types and urban centers	79

The movement economy and drive-by visibility	80	Street design and safety	135
Shallow storefronts	82	Context-sensitive versus context-determined design	138
How to calculate demand for retail	83	Classification based on the Transect	139
Terminated vistas	84	Visualizing the transformation of a street	140
Anchors as magnets	86	Nomenclature	140
Grocery stores adapt to urban trends	87	Width-to-height ratio	141
Inserting a supermarket into a town center	88	Narrow streets add value	141
Placing large, modern stores in urban blocks	90	Design versus target speed	141
How to mitigate the impact of big box stores	93	Major thoroughfares	142
Fitting big boxes on main streets	97	Freeway removal and redevelopment	142
Making a power center more civil	98	Reforming departments of transportation	144
Urban shopfront design	99	Balancing the needs of pedestrians and drivers	144
Tailoring town centers to people's behavior	100	One-way couplets	145
Tips on new urban retail development	102	Changing one-way streets to two-way	145
Drive-through retail	102	Crucial curb return radius	145
Town center plans	105	Traffic calming	146
		Cost	148
Chapter 6		The use of roundabouts	149
The Human-Scale Workplace		Roundabouts at a glance	149
The human-scale workplace	108	Shared space	150
Characteristics of new urban employment centers	108	Street connectivity	150
Assembling the building blocks	111	Beyond the curb: Edges are key	151
Key issues for office parks and mixed-use centers	112	Streets and fire trucks	152
Flex houses (live-work)	114	How to promote bicycling	154
		Bicycle facility planning	156
Chapter 7		Street sections: A full set of walkable street plans	157
Planning and Transit		Chapter 9	
Planning and transit	118	Civic Buildings and Spaces	
Three eras	118	Civic buildings and spaces	170
Transit-oriented development types	119	Civic spaces	172
Rail system design	121	Public space in Verano	173
Streetcar revival	122	Places for play	174
Bus rapid transit	122	Mid-block public spaces	175
Transit modes and applications	124	Fun with civic amenities	176
Examples of transit-oriented developments	125	Dog parks	176
Light rail to come	127	Principles of school design	176
Principles of transit-oriented development	128	Bringing the post office downtown	180
Incorporating buses into the New Urbanism	132	Religious buildings	181
Chapter 8		Ballparks as focal points	182
Streets			
Designing walkable, safe, and attractive streets	134		
The physics of street design	134		

Chapter 10		Chapter 12	
Codes		Charrettes	
Form-based codes and pattern books	184	The charrette as an agent for change	216
What's wrong with existing codes?	185	Who sponsors a charrette, and how is it funded?	217
Zoning barriers to compact development	186	The nine principles of the charrette process	217
Form-based codes: Eight advantages	186	The three phases of the charrette	220
Form-based code examples	187	A few helpful charrette techniques	222
What to code	188	Notes on the conduct of charrettes	225
Mandatory or voluntary	188		
Regulating plans	188	Chapter 13	
Urban regulations	188	Market Demand	
Object and context buildings	189	The market for urban places	228
Architectural codes	190	Change in perception	229
Street standards	190	Demographic shifts	229
Pattern books	191	Oversupply of large-lot housing	230
Other techniques	191	Energy and environmental considerations	231
Implementation	192	Target market analysis	231
The SmartCode	192	The importance of maintaining flexibility	232
Transect map and detailed plans	193	Visual surveys show greater acceptance of density	234
Statewide code requirement	193		
Applying the Transect	194	Chapter 14	
Porch, arcade, balcony	194	Finance	
Stories, not total building height	194	Investing in new neighborhoods	236
Rehabilitation codes	194	New Urbanism gains respect	236
Further reading	195	New Urbanism premium	236
Form-based code: Benicia	196	Strategies	237
Pattern book pages	202	Advantages for governments	237
		Why some developers resist	238
Chapter 11		Investing for the long term	238
Legal Planning		TIF financing in San Antonio	239
Legal planning for new urban communities	206	Forms of debt and equity	240
How new urban communities are different	206	Activity in smart growth funds	241
Owners' associations and private covenants	207	How individual investors can profit	242
Alternatives or adjuncts to owners' associations	207	Fairview Village case study	242
Tax-exempt organizations	208	Trinity Heights case study	244
Special considerations for a town center	209	Bradburn case study	245
Specialized building types	211		
Making association documents work	212	Chapter 15	
Making architectural codes work	214	Land Development	
		Developing neighborhoods	248
		Lot dimensions	248
		Top 10 TND mistakes	249
		Medium density often yields the best value	250

Lucas Point plan and lot types	253	Chapter 18	
Natural drainage systems		Affordable Placemaking	
can cut development costs	263	Keys to affordability	318
Navigating the public works minefield	265	How to make urban housing more affordable	318
More developers, better results	267	All units must look good	321
TND development tips	270	The density advantage	322
		Inexpensive character	323
Chapter 16		Variety in housing types	324
Architectural Styles and Building Types		The Grow House	324
Architectural styles and building types	272	Garage options and accessory units	325
Traditionalist-modernist contention	273	Accessory units add flexibility and affordability	325
Classical roots of the vernacular	273	Narrow streets save money	328
Why study the vernacular?	275	Avoiding underutilized collectors and arterials	328
Lessons from pre-1920s buildings	276	Commercial parking	328
Pros and cons of modernism	277	Policy	329
“Rational modernism”	279	Inclusionary zoning	329
Where Modern belongs	281	Location-efficient mortgage	329
A Modern house in a historical setting	282	Community land trust	329
Treatment of civic buildings	284	Reduced parking requirements	330
Punctuating the plan	284	Low-income housing tax credit	330
Evolving styles	286	Partnering with a nonprofit builder	330
Building types and arrangements	288	Density bonus	330
		Housing trust fund	330
Chapter 17		Streamlined review process	330
Building		Allow single-room occupancy buildings	330
Building: Concepts, methods, and materials	302	Transportation efficiency	331
Understanding production building	302	Cutting Costs	331
Volume and proportion	303	How to use low-cost foundations	333
Windows	304	Make streets and alleys narrow	333
Porches and columns	306	Reduce development costs	334
Architectural trim	308	Simplify the grid	334
Eaves and eave returns	308	Use existing infrastructure	335
Materials	309	Katrina cottages and manufactured housing	335
Fiber-cement	309	Whole house system	336
Using proportion effectively	310	Vinyl siding	336
Houses close to the street	310	Tips for TNDs on a budget	338
Backyards and sideyards	311		
Builder education	312	Chapter 19	
Inappropriate, appropriate facade design	313	Marketing	
Inappropriate, appropriate site planning elements	314	Branding and marketing smart growth communities	340
Main building, back building, ancillary building	315	Smart growth amenities, benefits	341
Other resources	316	Lessons learned	344
Porch principles	316	Great returns from events marketing	346

Reducing the need for parking	417
Alleys and lanes	417
Lot design	418
Parking courts	418

Chapter 26

Landscape

Greening cities and towns	420
Principles for a well-landscaped city	423
The nature of trees	424
A Transect-based approach to trees	425
Urban landscape types and forms	426
Agricultural urbanism	427
Organic farming in a TND	430

Index	431
